## Web Frontend Developer (m/w/x) – Vue.js/Nuxt.js

### Role description

- Development of our Vue.js / Nuxt.js based frontend components & kickstart package
- Automated test coverage and quality assurance tools
- Participate in our agile development process (Sprint planning, review & retro, Peer reviews)
- Continuous development and maintenance of Nuxt.js based web sites

### Your profile

- Experience working with Vue.js / Nuxt.js
- Solid knowledge of writing and maintaining Vue.js applications
- Ability to handle your local work environment (Docker, NGINX, ...)
- Experience of working with Git (Pull Requests), SSH and the Linux shell
- Web Accessibility and/or test automation expertise beneficial

### Your qualifications

- Fluent English skills, spoken and written. German is a plus.
- You are a team-player, communicative, self-reliant, adaptive  
... and you love to continuously improve and grow with us!

### What we offer

- Interesting projects with high-profile customers located in the German speaking area!
- Employment on-site in Austria (Vienna, Linz) or freelance remote position possible (no agencies, EU timezone is required)
- Low hierarchies, friendly work atmosphere & room to improve!
- Full or part time position (20 to 40h / week) with a decent salary (starting with 2.800€ full time – payment depending on qualification and experience).
